01 Chairman's Message

Chairman's Message

“ Supporting healthcare providers in Saudi Arabia is our core mission ”

Medad medical services is a SFDA registered Saudi company based in Eastern region. We are a state-of-the-art company specializing in outsourcing compounded sterile preparations CSP (Parenteral Nutrition, IV Medications and Chemotherapy). With a population of more than 35 million and Kingdom 2030 vision to support private sector investment in healthcare, Medad will support healthcare organizations to provide patients with high quality, convenient and cost-effective solutions. It is our intent that Medad be continuously recognized for not only its outstanding services, but also because we consistently conduct our business in line with our values and in accordance to local and international quality standards.

Eng. Saud Abdulaziz Al-Shaikh

MEDAD Medical Services Company
Board Chairman

02

Introduction

Introduction

MEDAD Medical Services Co. is an admixture outsourcing facility specialized in compounded sterile preparations. We provide high-quality admixture services and solutions to hospitals and outpatient facilities throughout the Kingdom of Saudi Arabia and other Gulf countries.

At MEDAD, technology meets humanity. We are dedicated in providing a wide range of high quality and state-of-the-art medical services that allows us to promote and improve the healthcare of our clients with compassion and sensitivity to the individuals and their families.

03

About Us

Company Overview

Our Company is based in Dammam and will boost local content in the pharmaceutical sector. It will satisfy the needs of Eastern Province as well as raise technical capabilities of locally based pharmacists. The new venture will also provide a highly qualified specialized training stemming out of industry real-life setting as well as a highly engaged research unit with the medical sector.

We are a specialized compounding facility that prepare and produce the IV solutions which are given to patients to provide nutrients and medications through vein.

Research and Development

3

Research Center

MEDAD Medical Services has a strong clinical service team with a history of product innovation and development of products that are in short supply and/or required by our hospital partners.

MEDAD Medical Services is committed to find new and innovative methods to meet the clinical needs and support the most remarkable patient care and outcomes. New product development is one of our core capabilities. Getting the essential products needed through the use of the most advanced innovative technology for compound parenteral nutrition and patient-specific hazardous and non-hazardous dosage selection. doses.

The clinical service group Lead by Pharmacist, Chemical Engineer, Clinical Drug Evaluation, Drug Safety/ Therapeutic Evaluation, Initial Formulation Research, Finalize Clinical Drug Evaluation, Dosing, Route of Administration, Clinical Fit Evaluation, and Regulatory Evaluation.

MEDAD Medical Services in future planning participate in clinical trials which include outsourcing of sterile preparation and publications.

08 Future Plan

Increase Offering

We will have a fully qualified GMP facility capable of handling almost any type of Sterile compounding requirement. The flexibility in being able to adapt our facility will ensure we are able to grow into the market with any new product offering. Our research will identify, and test new products needed. Our experts will then ensure commercial viability and push it through production.

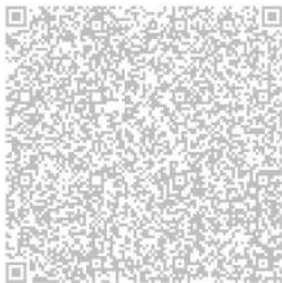

Expand Geography

After ensuring a solid foot hold in our geography and the raise of barriers of any new entrants, we intend to expand into new geophagy following opportunities outside our primary market. We will have the prepared workforce through our Training Program, the Capital through our earnings and the ease of raising more capital based on a proved record.

Grow Production

We anticipate utilizing 80% of our production capacity during Year 7. We, therefore, planned for an additional production unit within an expansion project. Partial allocations from earnings from early years will constitute the budget for the expansion project we do not anticipate the need for additional funding. The budget for the New Production unit is already incorporated in the Financial Model
